

Oracle Analytics Cloud

The most comprehensive analytics in the Cloud

Roberto Falcinelli

Senior Manager - Big Data & Analytics Domain Leader

Oracle Technology Sales Consulting

Milano 8 Giugno 2017

Smart Analytics for Everyone

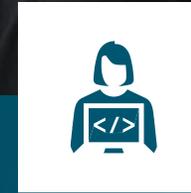

ANALYSTS

- Faster time to insights
- Share, collaborate and maximize community's wisdom

BUSINESS LEADERS

- Easy, timely, proactive business insights
- Empower to go beyond consuming others' findings

DEVELOPERS

- Develop and deploy analytic applications for people to customize and personalize
- Embed analytics in any application context

Requirements of an Analytic Platform

Analytics-as-a-Service

IT

Business

Proactive analytics & scenario modeling

Governed analytics

Self-service discovery

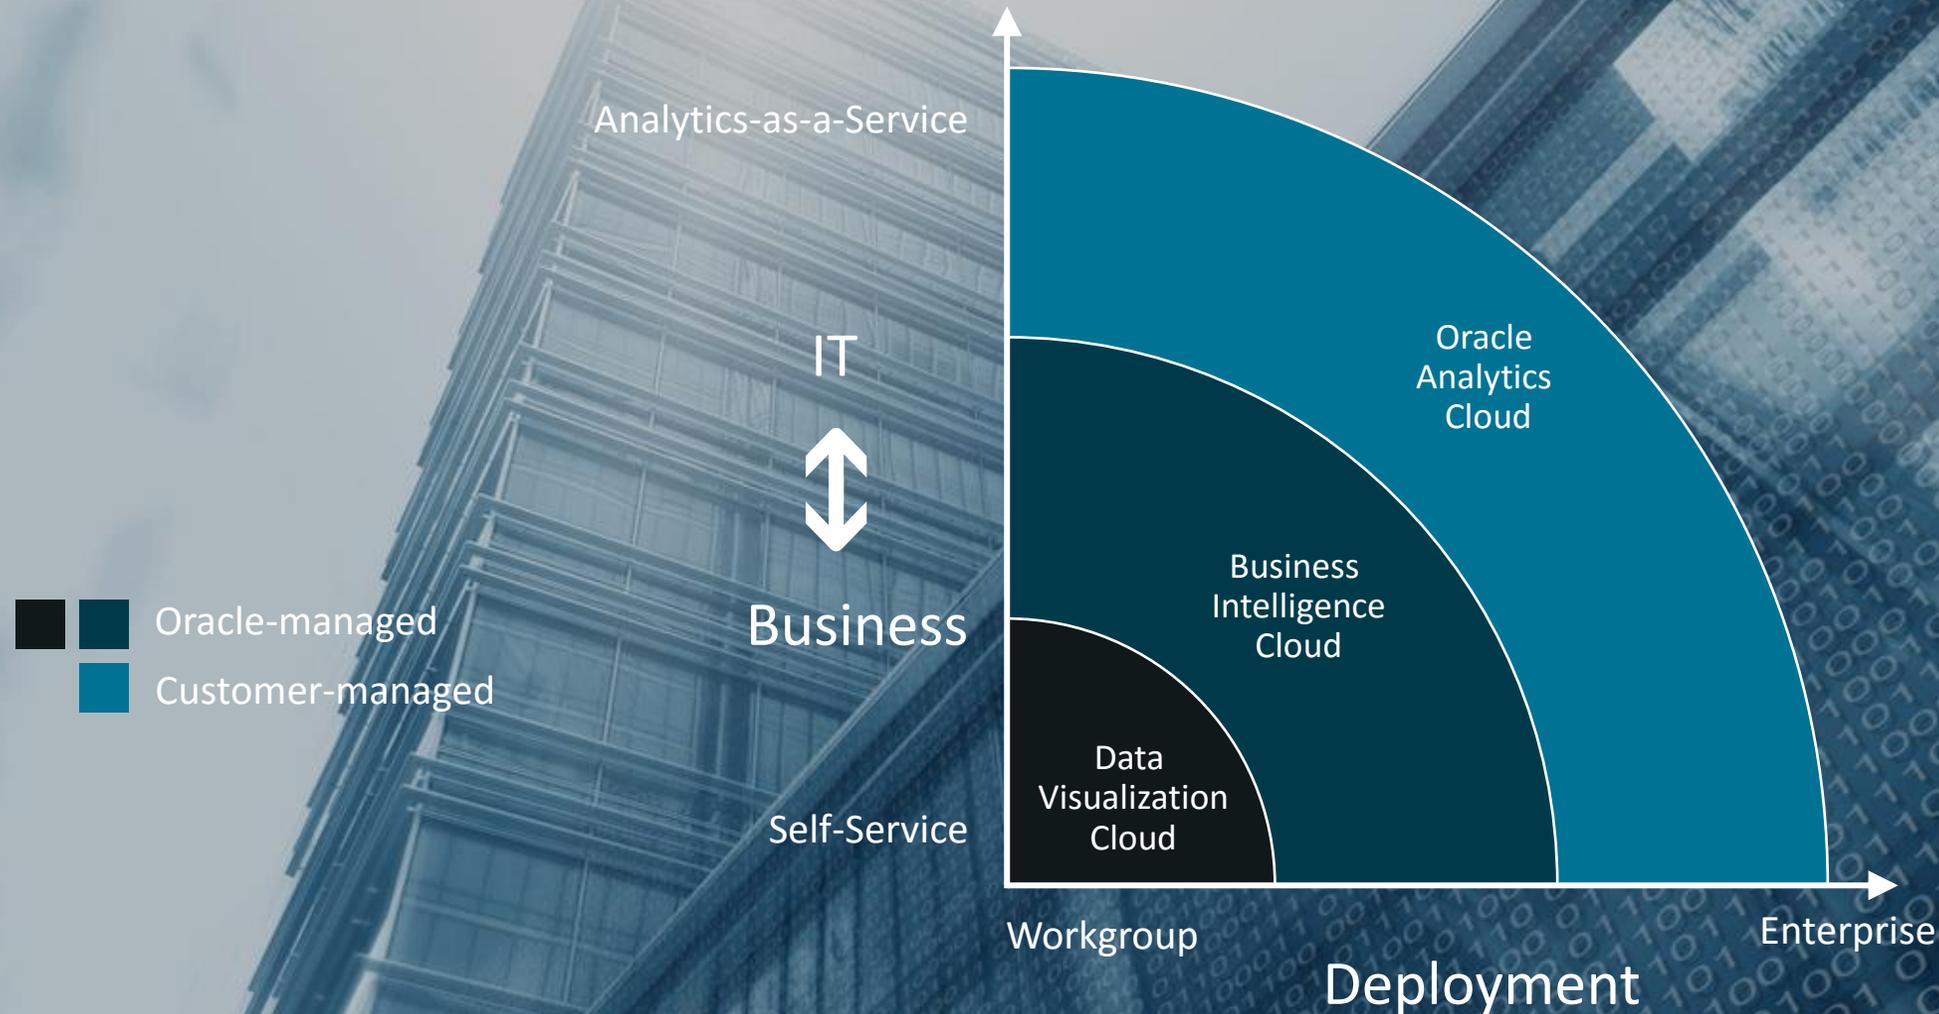

Self-Service

Workgroup

Enterprise

Deployment

A Solution for Everyone

Oracle Analytics Cloud

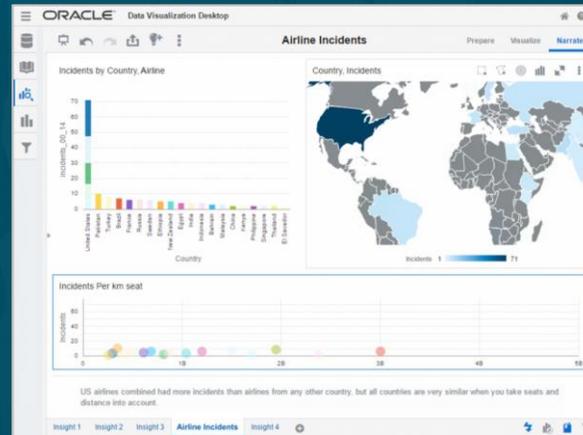

Business Analytics

A proven platform for creating powerful business intelligence applications, enabling users from the workgroup to the enterprise

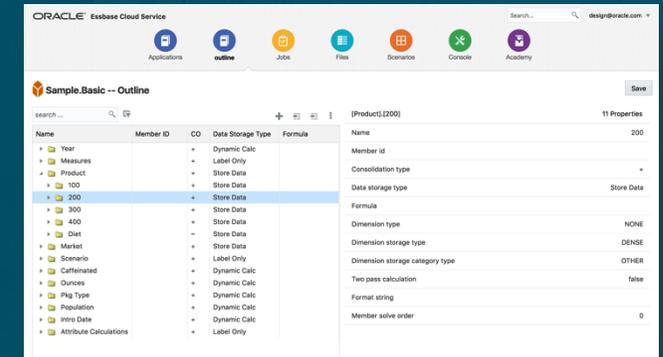

Data Visualization

Get instant clarity with stunningly visual analysis and self-service discovery. Fast, fluid insights for the entire organization

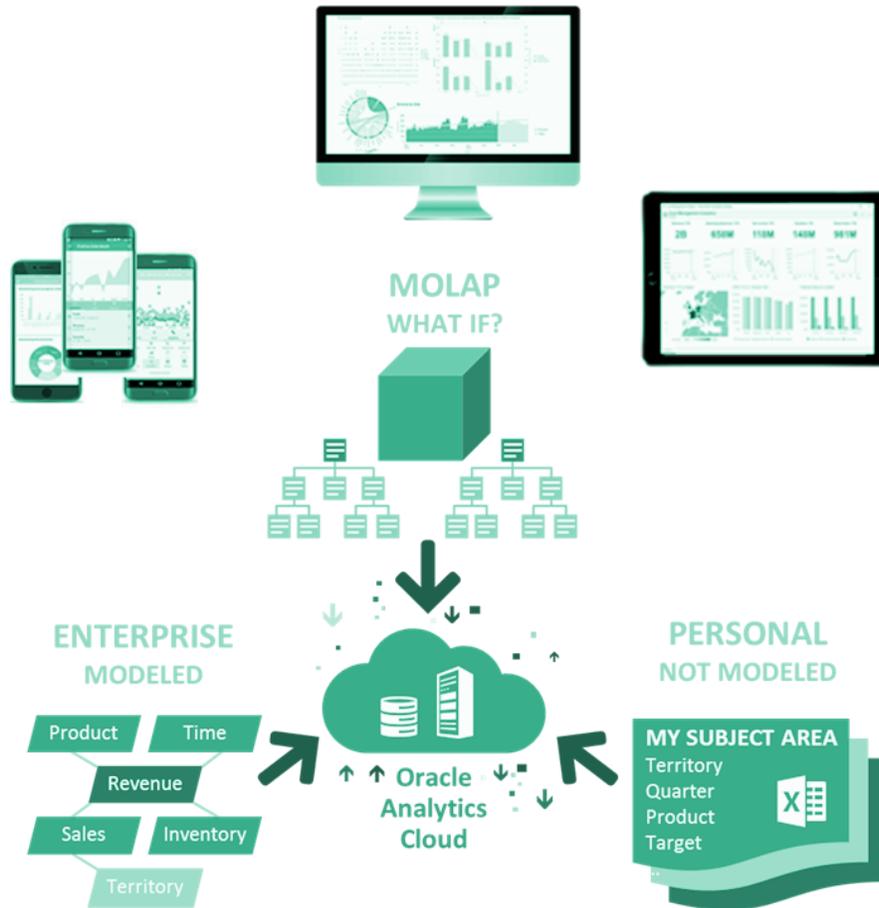

Essbase

Flexible platform for the creation of departmental or enterprise-wide custom analytic applications and management reporting

Oracle Analytics Cloud (OAC)

- “All-in-One” Subscription
- Complete Functionality
- Customer Managed
- Easily Scalable
- Customizable
- Fully Accessible

Standard Edition

Data Visualization
+
Essbase (Standard Edition)

Enterprise Edition

Data Visualization
+
Modeling & Enterprise Reporting
+
Essbase (Enterprise Edition)

Includes Mobile, Client tools & Desktop

The Oracle Analytics Cloud powers your story with data.

Your Story (data)

COMPLETE

- ✓ All capabilities
- ✓ All roles
- ✓ Any scale

CONNECTED

- ✓ Right Data
- ✓ Right Time

COLLABORATIVE

- ✓ Modern way to work across teams

CHOICE

- ✓ Flexibility of deployment
- ✓ Balance between governance and freedom

Any Scale, From Personal to Enterprise

COMPLETE

- Self-service data discovery together with enterprise-class reporting and analytics
- Users don't need help to go from spreadsheets to what-if scenarios and modeling
- Create operational analytics from centrally managed metrics

Enhance All Data with Powerful Data Preparation

COMPLETE

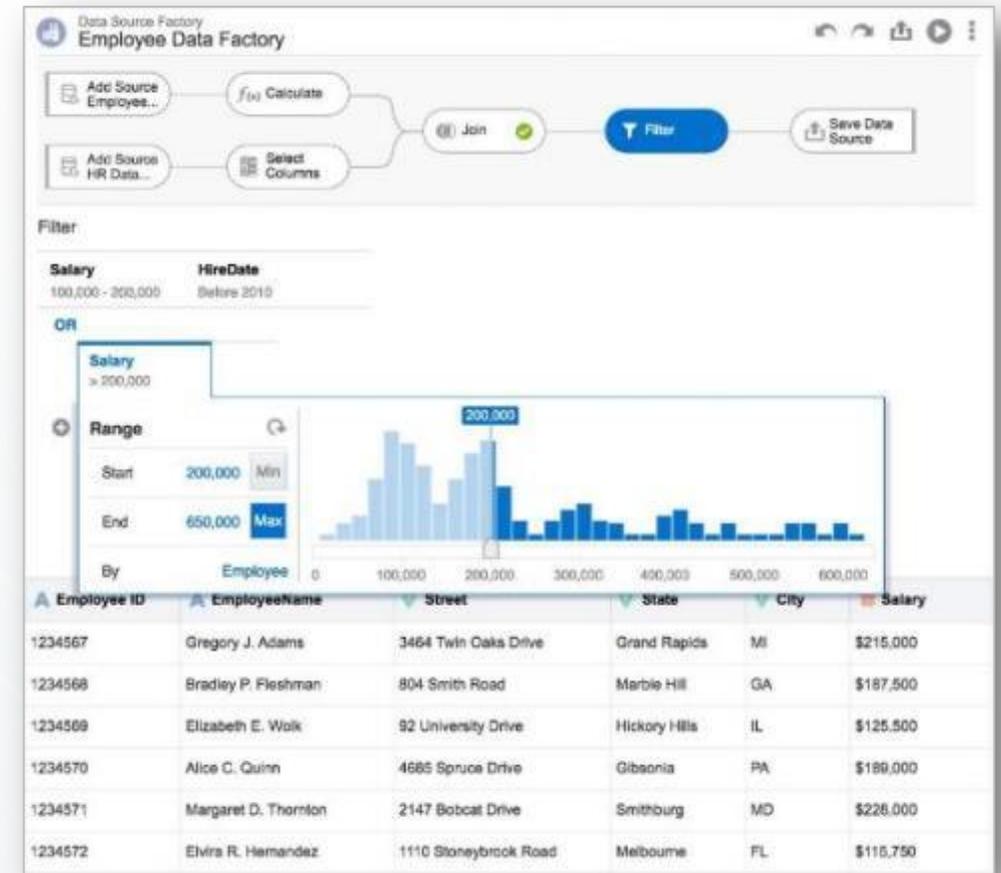

Accessible to non-technical Business Users

- Traceable business transformation
- Group values, join data sets, sub-select rows/columns, aggregate, calculated fields etc.
- Back-end SQL processing - function shipping via smart code generation, compensate with in-memory execution

Function extensibility via R and Python

- Full R and Python grammar for statistical, Machine Learning, textual models
- Reach-in to data sources' specific routines (e.g. Machine Learning in Spark, custom functions) while operating on a single data abstraction

Roadmap

Extensible, Grammar-Driven Visualization Palette

COMPLETE

Extensive Data Visualization Capabilities

- Rich palette of chart types with **35** built-in chart types, **20+** downloadable add one, **100's** of 3rd party options with D3 and Google Charts
- Trellising for every visualization
- Customizable global color palette
- Brushing – highlight correlations within data across visualizations, all auto-wired to work/update in unison, leveraging in-memory cache/execution layer
- One click access to common statistical functions – outliers, trend lines, forecasts for N periods, others
- Define every chart as a filter for interactive exploration

Ask Your Data Questions

COMPLETE

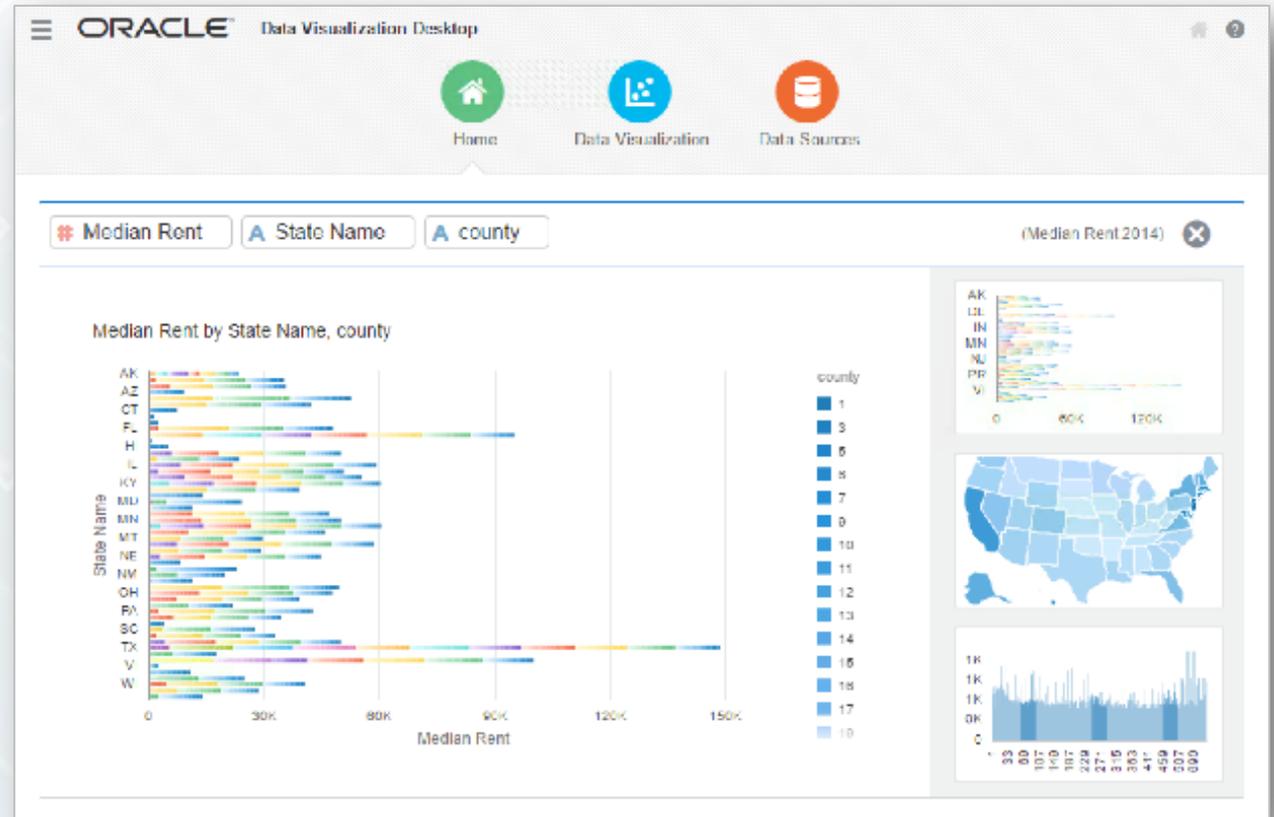

Powerful, intuitive keyword search with BI Ask

- Voice-enabled
- Interprets semantic layer, user private data, expression library and catalog artifacts
- Fuzzy match, stemming, natural language processing
- Generates on-the-fly queries - visualizations are auto-created while user types

NLP Across the platform

- Enhance current keyword/token based enterprise voice enabled search with the following natural language processing tasks
 - Sentence segmentation
 - Deep analytics
 - Named entity extraction
 - Co-reference resolution

Oracle Analytics Cloud
**TALK WITH
YOUR DATA
DEMO**

The Right Data From Any Source

Easy access to a variety of data sources

- **40+** different data sources
- Few clicks to setup and use
- Will expand coverage to enable access to every industry-specific source via native connectors or developer community

New Data Sources

- **80+** data source by the end of the year
- Essbase, PBCS, Big Data CS, Oracle Service, Dropbox, Google Analytics, Google Drive
- Oracle Talent Management Cloud (Taleo), Oracle Doc Service, Oracle Marketing Cloud (Eloqua), Odata, Sharepoint

Roadmap

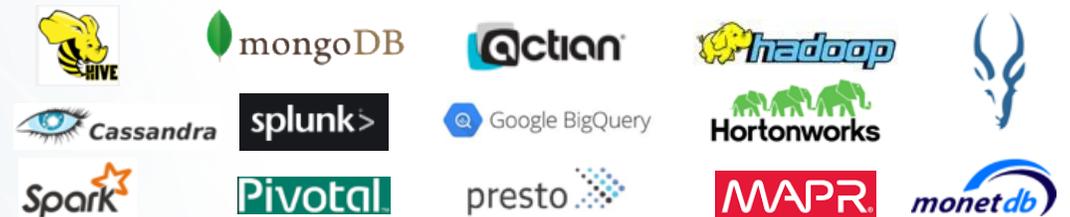

SAAS / PAAS

DATABASES

BIG DATA NO SQL

OTHERS

CONNECTED

Role-Based Visualization Content Packs

Pre-built data visualization content

- Included with Oracle Data Visualization Platform
- Extends OTBI insights with pre-built data visualization sample content
- Targets specific line-of-business personas
- Identifies difficult-to-spot business opportunities, innovations and patterns
- Blends data across business functions, lines of business and applications
- Quick ad-hoc exploration of OTBI and other data with intuitive business user interface
- Near real-time access to data from OTBI and other Oracle application sources

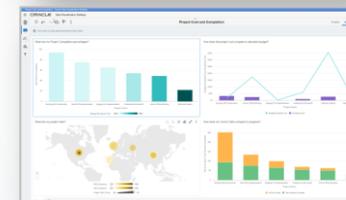

Finance Manager

- Revenue Overview
- Revenue and Headcount Analysis
- Cost Management

Project Manager

- Campaign performance
- Campaign cost

Sales VP

- Top deals in Play
- Sales review
- Pipeline trend
- Revenue trend

Marketing Analyst

- Campaign performance
- Campaign cost

Payables Manager

- AP Balances
- AP Holds
- AP Overdues

Grants Manager

- Budget vs. Actual
- Award Cost Details
- Award Encumbrance Details

Sales Manager

- Team performance
- Quota attainment
- Pipeline review
- Demand generation

Service Manager

- Open incidents
- Closed incidents
- Team performance

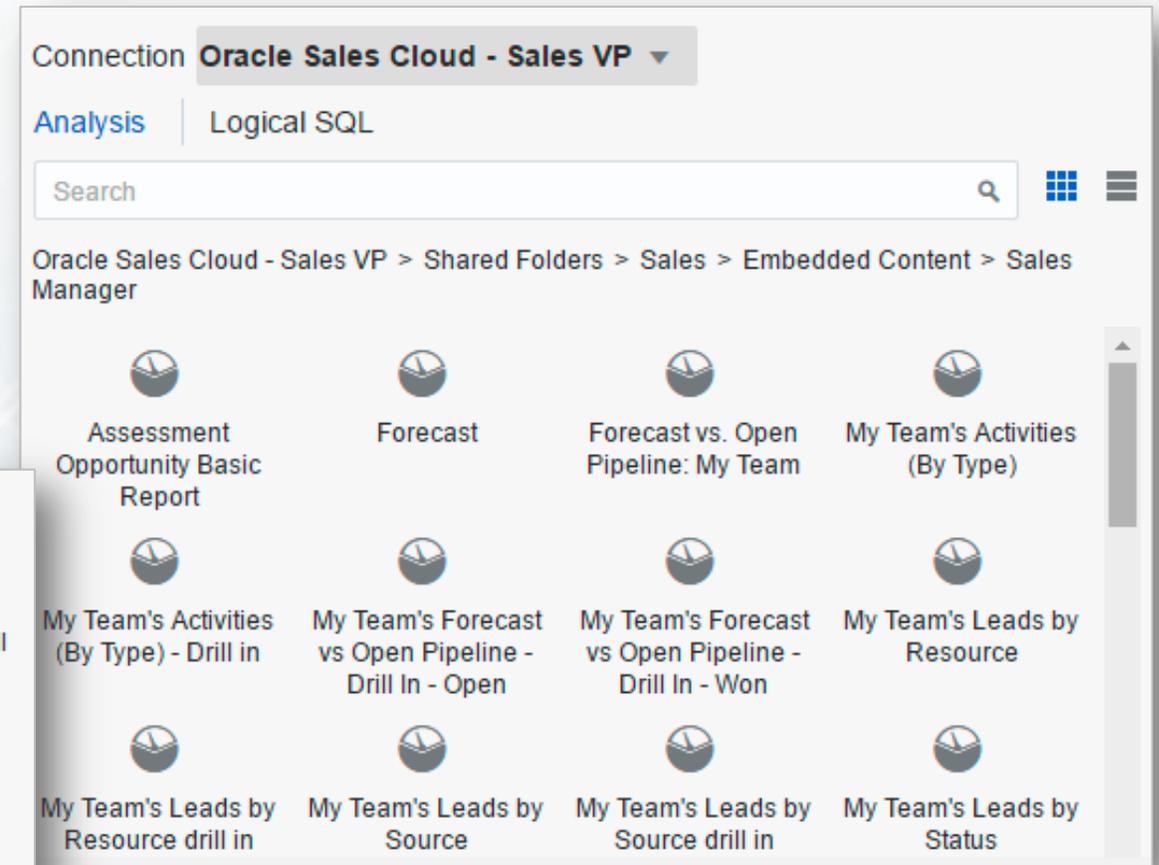

Smart Connectors to Role-Based Business Content

CONNECTED

No re-work required for Oracle SaaS Applications

- Access to business entities, not just tables and columns
- Respects security, business rules, and governance on source systems
- Browse and select thousands of packaged views as data sources
- Leverage calculations and business logic in reports

Easily Extensible and Embeddable

Visualization SDK (JAVA)

- Develop custom visualizations
- 100% functional, LCM parity with native visualizations

Function extensibility (R, Python)

- Extend the expression library with custom functions (e.g., stats, machine learning or textual functions)

Data source extensibility (JAVA)

- Add data connectors to non-native sources

Seamless UI embedding (Java Script)

- Context propagation, skinning flexibility, seamless bi-directional navigation, well-defined REST endpoints

REST APIs

- Use the Oracle Analytics Cloud as an Analytics platform

Oracle Analytics is embedded in millions of users' day-day experiences

- Oracle HR SaaS: Oracle Talent Cloud, Oracle CX SaaS: Oracle ERP SaaS and Oracle SCM Cloud

Roadmap

Roadmap

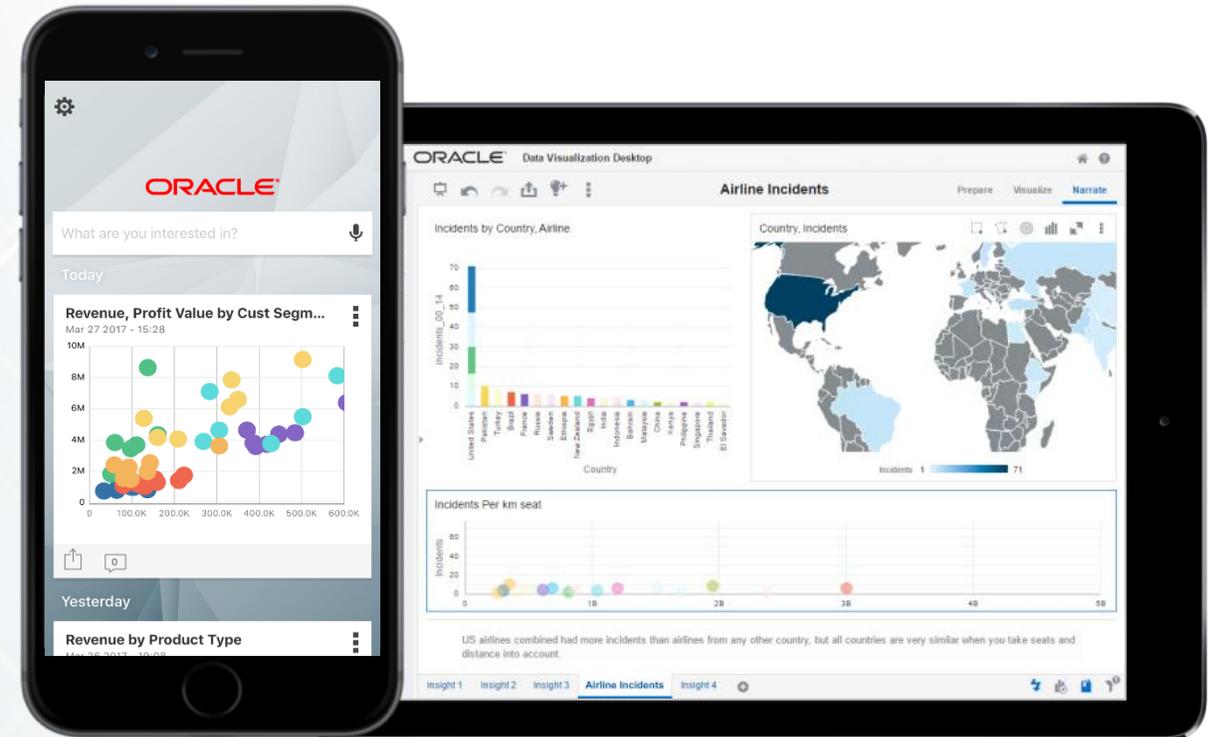

Analytics That Are Modern, Mobile, Social

COLLABORATIVE

- Proactive analytics deliver self-learning insights and recommendations to you and your crew
- Interactive stories illustrate insights, increasing collective understanding and expertise
- Search and voice-driven analysis power a modern mobile experience

COLLABORATIVE

Build Collective Intelligence, Consumer Style

Day-By Day: Anticipates needs through self-learning

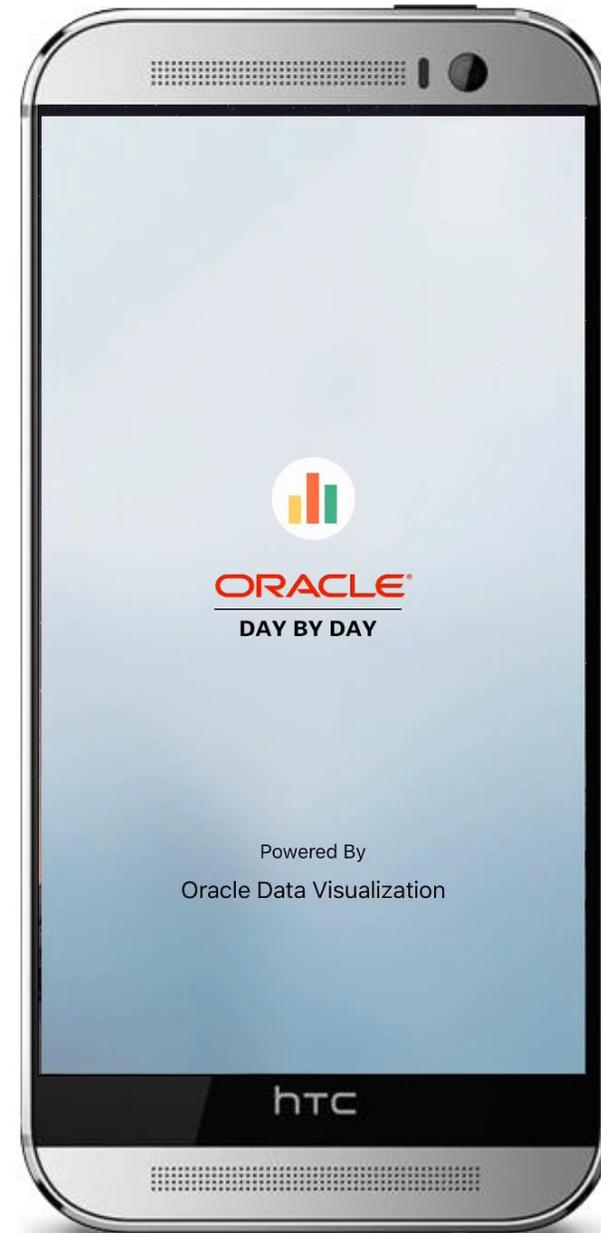

- Infuse data-based insights into daily activities
- Use your device's voice capabilities to obtain answers
- Anticipate what users need and deliver appropriate information to help them make better informed decisions throughout the day

Synopsis: Process any Excel/CSV file on mobile devices

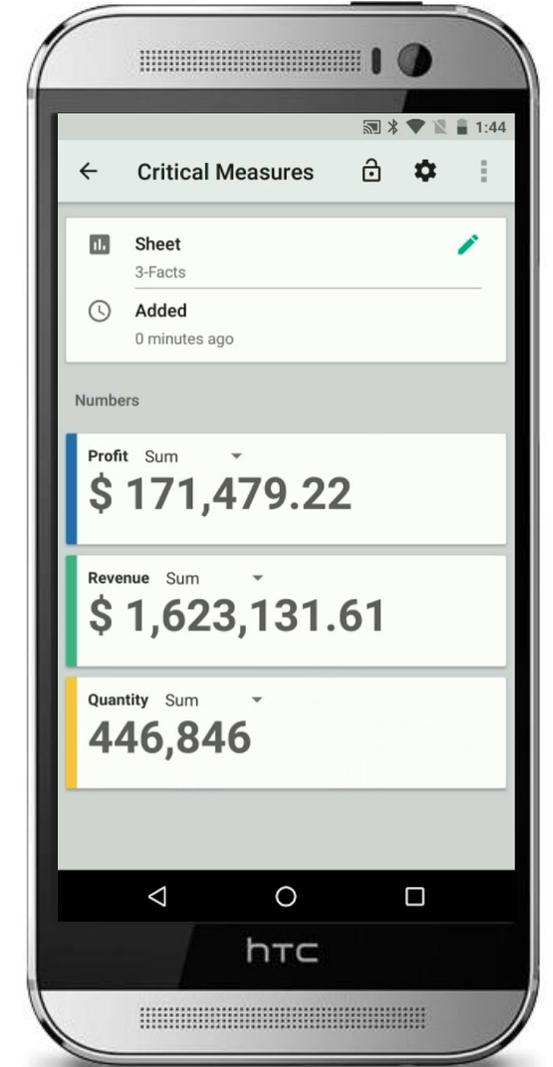

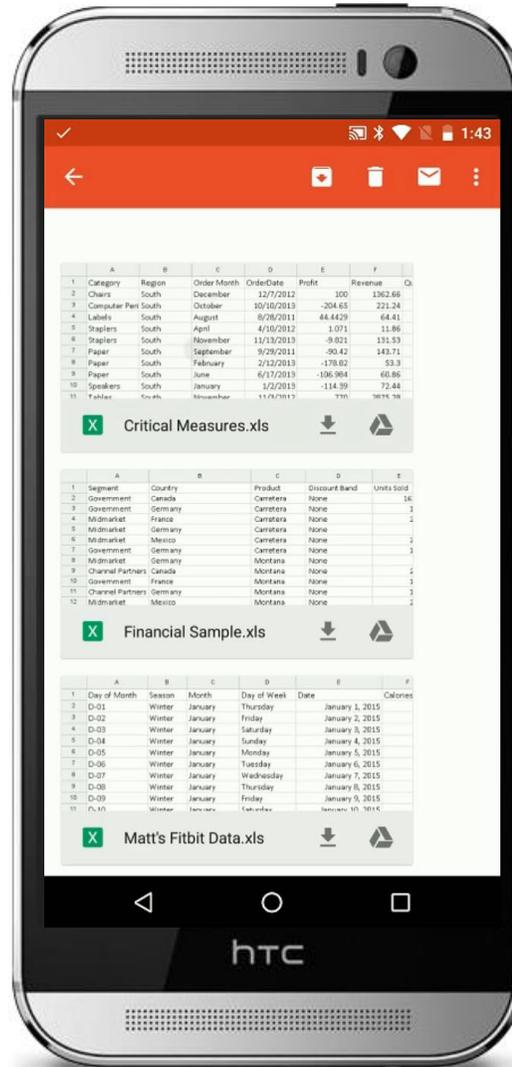

- Data on the device is automatically turned into visual representations that the user can modify
- 100% on device analytics – no connection required
- Native device interactions with the ability to handle large data sets in visualizations

Oracle Analytics Cloud
USE YOUR DATA
“CONSUMER-STYLE”
DEMO Day by Day

Oracle Analytics Cloud
USE YOUR DATA
“CONSUMER-STYLE”
DEMO Synopsis

Business Freedom and Data Governance

CHOICE

- Balance user autonomy and governance
- Combine all relevant information from any data source, managed and self-service
- Stay productive with intelligently optimized queries

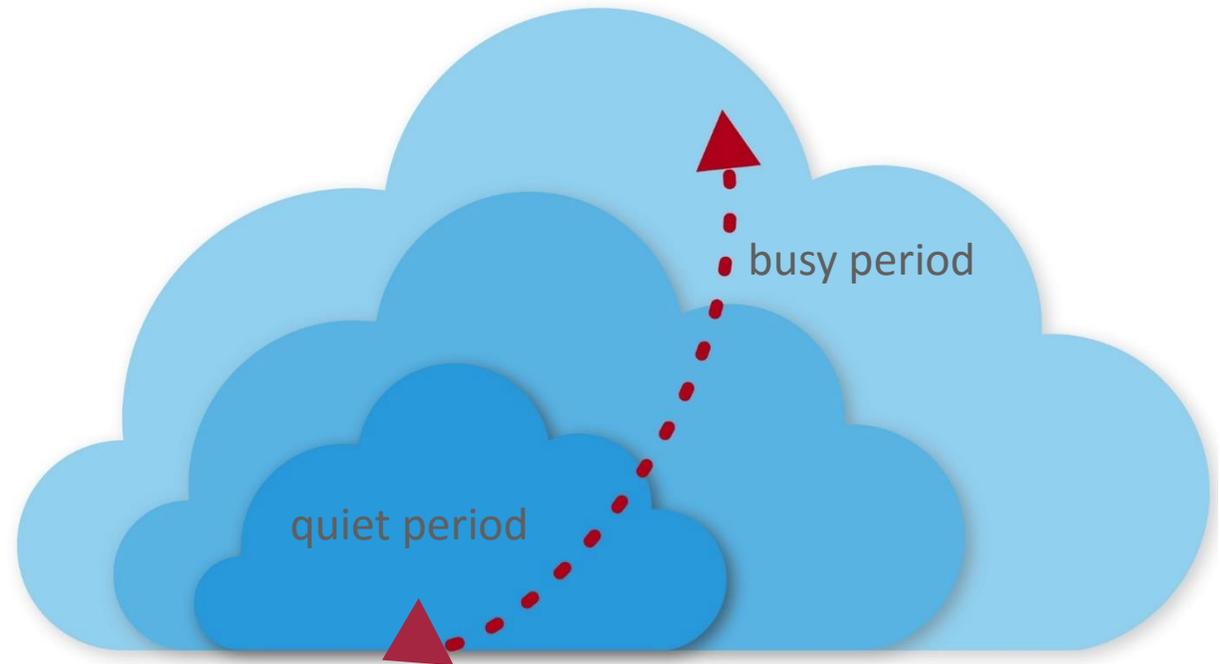

Elastic Resources for Busy Periods

CHOICE

Customer managed resources

- Take control of resources requirements without the need of Oracle interference
- Increase analytics resources to handle busy periods
- Reduce analytics resources during quiet times for cost savings
- Never again have slow analytics response times during your business critical periods

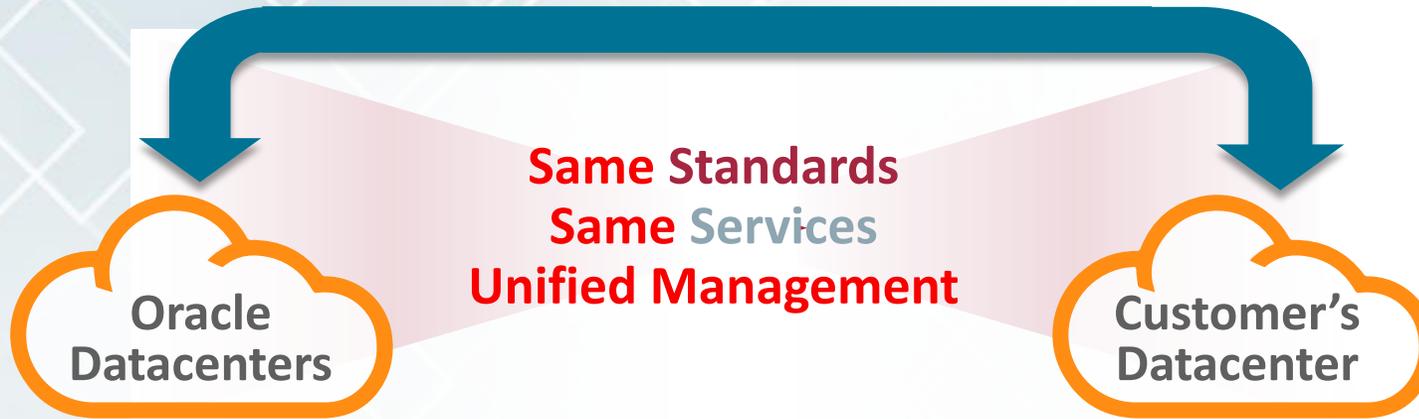

Oracle Cloud Machine

Complete deployment choice

ORACLE® Cloud

PaaS						
Java EE	Mobile	Big Data	Database	Analytics	Data Integr.	IoT
IaaS						
Network		Storage	Compute			

- Oracle Cloud operated and **delivered as a service** behind your firewall
- **Same** PaaS and IaaS software, same updates as Oracle Cloud
- Same cost-effective **subscription** pricing model as Oracle Cloud
- Conforms to regulatory, privacy, legal, and business requirements

The background of the slide is a photograph of a large, modern suspension bridge with a complex steel truss structure. The bridge spans across a body of water, and the sky is a pale, overcast blue. The perspective is from a low angle on the bridge deck, looking towards the horizon where the bridge's cables and towers converge. The overall mood is industrial and forward-looking.

ORACLE[®]

ANALYTICS CLOUD

Technical Overview

Essbase in the Cloud

Iterative Scenario Analysis

- Modernized architecture for cloud
- Personal to enterprise business modeling
- Sandbox for scenario analysis/what-if
- Next generation Excel integration includes cube design, dimension modeling and KPI's
- Wide-range of business modeling and management reporting applications
- Integration with Data Visualization Cloud Service

Enterprise vs Standard

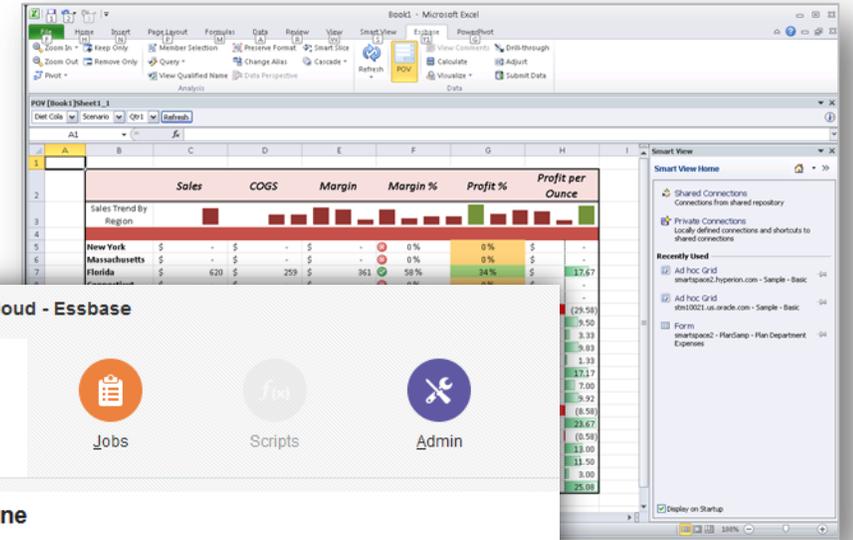

Enterprise Capabilities Include

Sandboxing

Partitions to sources outside of the compute

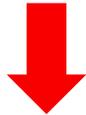

Drill Thru Capabilities (not in v1)

Additional differentiators will be introduced in upcoming releases

Name	Member ID	Statistics	Formula
Accounts		C.8 D.68 G.1 L.3	
Scenario		C.8 D.8 G.1 L.1	
Department		C.13 D.13 G.1 L.1	
Time		C.2 D.18 G.1 L.3	
Year		C.1 D.12 G.1 L.2	
Region		C.12 D.12 G.1 L.1	

Analytics Cloud: Built on Oracle Compute

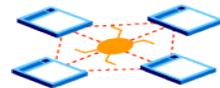

Resource Management

Lifecycle Management

Secure Access

Virtual Networking

Key Features

- **Resource Management:** Run any application at scale with consistency
- **Lifecycle Management:** Provision and manage service environments through a UI or Script via REST API
- **Secure Access:** Security Groups and Access Control to secure network access, SSH access to the VM
- **Virtual Network:** Range of networking options to enable private and faster connections

Benefits

- Predictable Performance
- Speed Innovation & Agility
- Co-Existence & Seamless Migration

How is Analytics Cloud different from existing services

	BICS & DVCS today	Analytics Cloud
Automatic backup	Oracle	Customer
Service monitoring	Oracle	Customer
Patching/upgrade	Oracle schedules and performs patching	Customer patches at will using a single click or a command
CPU & Memory	Oracle decides resources to allocate based on usage	Customer can decide CPUs and Memory and pay for what they allocate
Server access and config.	Customer cannot access server or change config not exposed in UI	Customer can SSH into the server to change config (may complicate patching/upgrade)
Network and security config.	Limited config supported	Full control on network access including VPN configuration
Database dependence	BICS requires purchase of Schema service BIS50	Customer needs to provide at least 1 OCPU DBaaS Standard instance (\$300/month)
IaaS dependence	No IaaS required	Requires customers to purchase some IaaS for network and storage - \$30/TB/month, \$0.02/GB/month

OAC Supported Compute Shapes

OAC Supported Compute Shapes:

Shape	OCPU / Memory
OC3	1 / 7.5
OC4	2 / 15
OC5	4 / 30
OC6	8 / 60
OC7	16 / 120
OC1M	1 / 15
OC2M	2 / 30
OC3M	4 / 60
OC4M	8 / 120
OC5M	16 / 240

An OCPU provides CPU capacity equivalent of one physical core of an Intel Xeon processor with hyper threading enabled. Each OCPU corresponds to two hardware execution threads, known as vCPUs.

OAC Service Dependencies

Oracle DB Cloud Service

=> System Schema (RCU)

Oracle Compute Block Storage

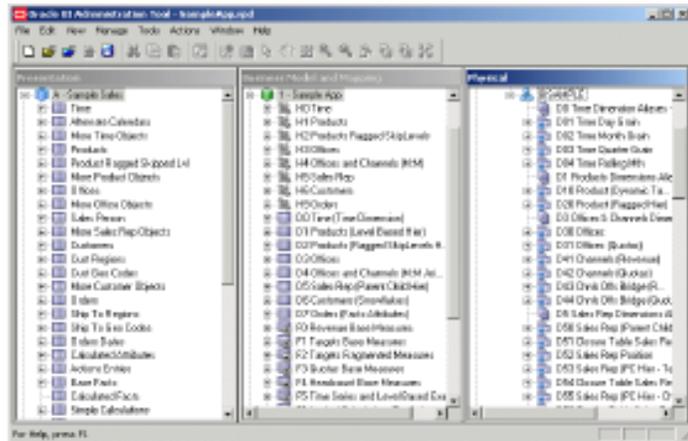

=> Binaries, Logs, etc

Oracle Storage Cloud (Object Storage)

=> Backups, DV Datasets

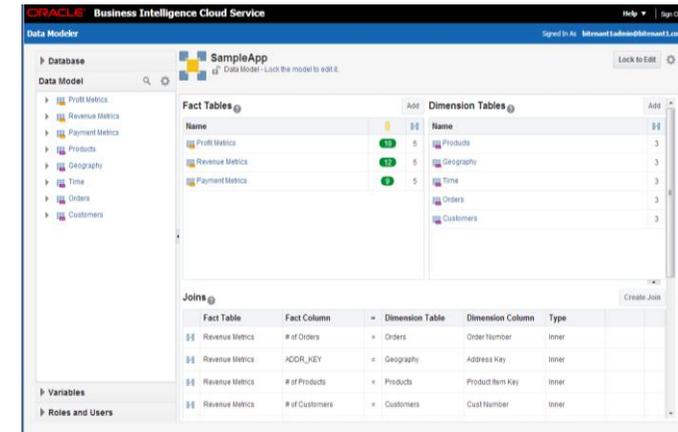

Data Modeling

Data Integration and Access

ETL
SQL*NET

Data Sync
On-premise data sources
Web services

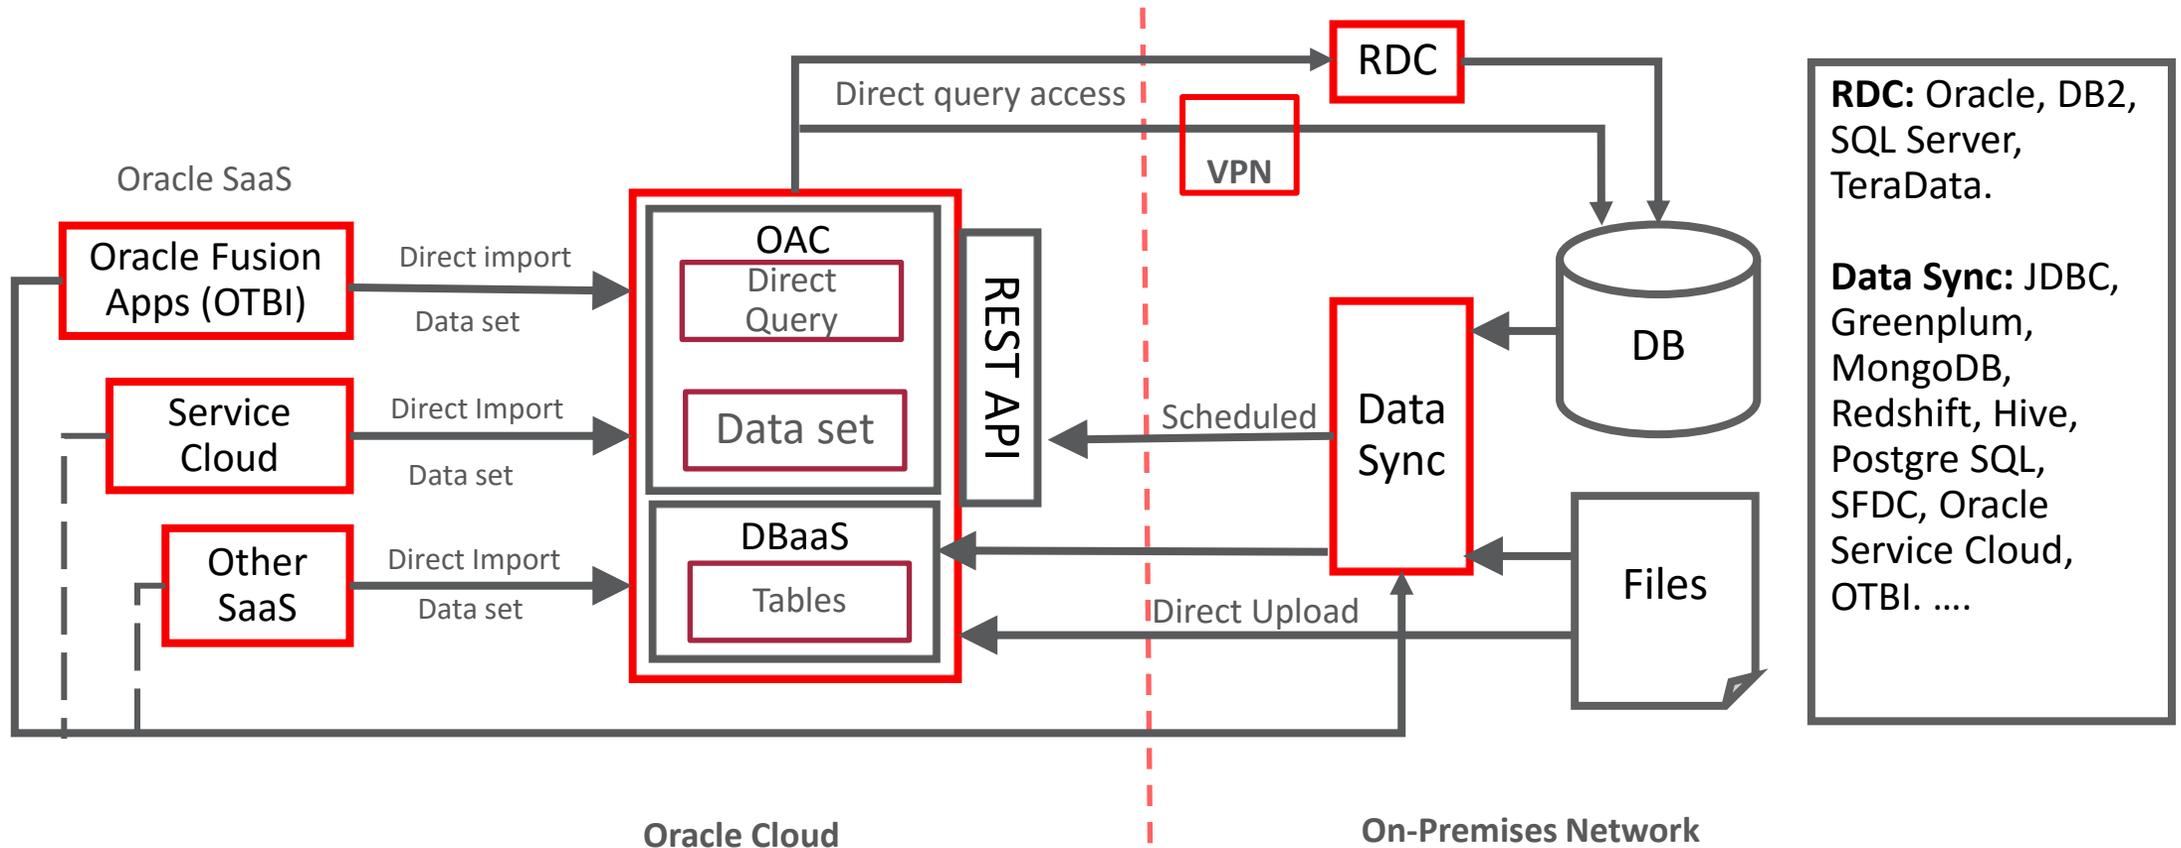

Direct Query
Via RDC or
Virtual Networking

DV Connections
Cloud to Cloud
Virtual Network for On-Prem

OAC Data Integration – Hybrid Deployment

Oracle Analytics Cloud – Customer Managed

- Provisioning
 - Customers are responsible for provisioning services
 - Allocates OCPUs in a subscription to individual services
- Service Management
 - Setup and manage backups
 - Apply patches and upgrades
 - Setup access rules to the service
 - SSH access to the file system
- Provisioning and service management available through My Services GUI and REST API

Oracle Analytics Cloud PROVISIONING DEMO

The screenshot displays the Oracle Cloud My Services console for Oracle Analytics Cloud. The top navigation bar includes a hamburger menu, the Oracle logo, and the text "ORACLE® CLOUD My Services". Below this, there are tabs for "Services" (selected), "Activity", and "SSH Access", along with a "Welcome!" message. A summary bar shows: 3 Services, 4 OCPUs, 30 GB Memory, 405 GB Storage, and 3 Public IPs. The "Services" section has a search bar and a "Create Service" button. Three services are listed: BIEE2002, ESEE0802, and DVPAT2002. BIEE2002 and ESEE0802 have identical specifications: Version 17.1.5-20170207034637, Created On Feb 20, 2017 4:24:51 PM UTC, 1 OCPU, 7.5 GB Memory, and 135 GB Storage. DVPAT2002 has a "Subscription: Hourly", Version 17.1.3-20170106214035, Created On Feb 20, 2017 1:21:50 PM UTC, 1 OCPU, 7.5 GB Memory, and 135 GB Storage. A warning message states: "Last Activity SYSTEM_UPDATE Feb 23, 2017 4:53:58 AM UTC failed. See Activity Log for Details". A notification for DVPAT2002 says "One or more patch(es) available".

Oracle Analytics Cloud vs OBIEE (as of today)

- No BI Publisher
 - Expected in Q1 FY 18
- Delivers Lite only
 - Full Delivers in Q1 FY 18
- Action Framework
 - JavaScript Actions, Web Service Actions, EJB Actions will not be supported
- No Scorecards
 - Not expected
- Security
 - WLS LDAP in v1, IDCS in v1.5
 - Non-standard providers not supported
 - Act-as not supported
- Answers Custom Map Layers not supported
- Marketing Segmentation not supported
- VM customizations may not be preserved or prevent lifecycle management

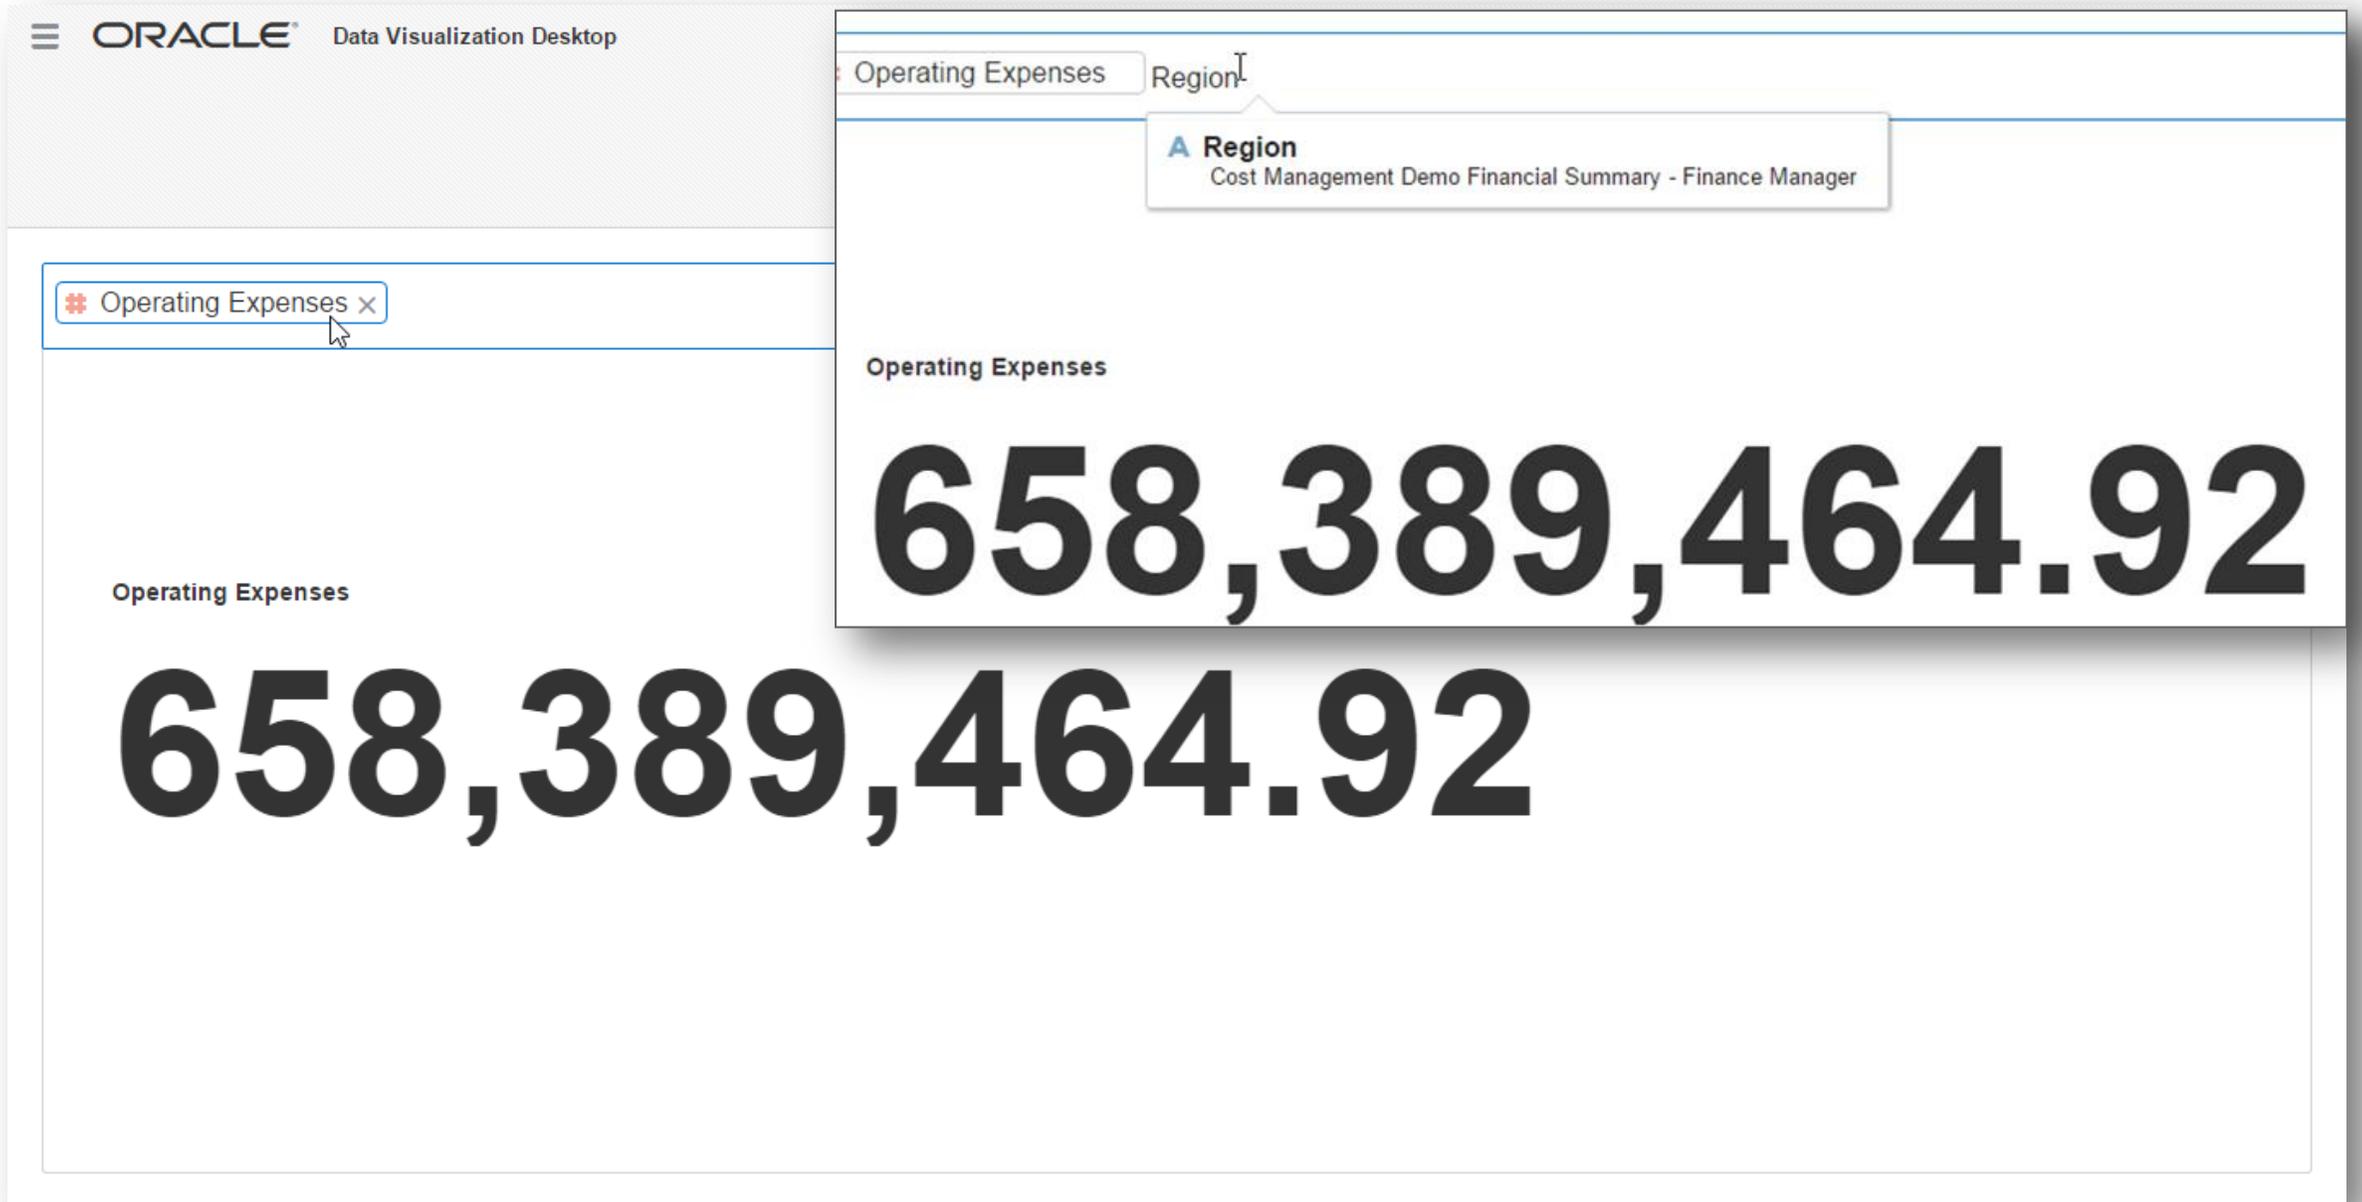

conversare con i dati:

The screenshot displays the Oracle Data Visualization Desktop interface. The top navigation bar includes the Oracle logo and the text "Data Visualization Desktop". Below the navigation bar, there are three main sections: "Home", "Data Visualization", and "Data Sources".

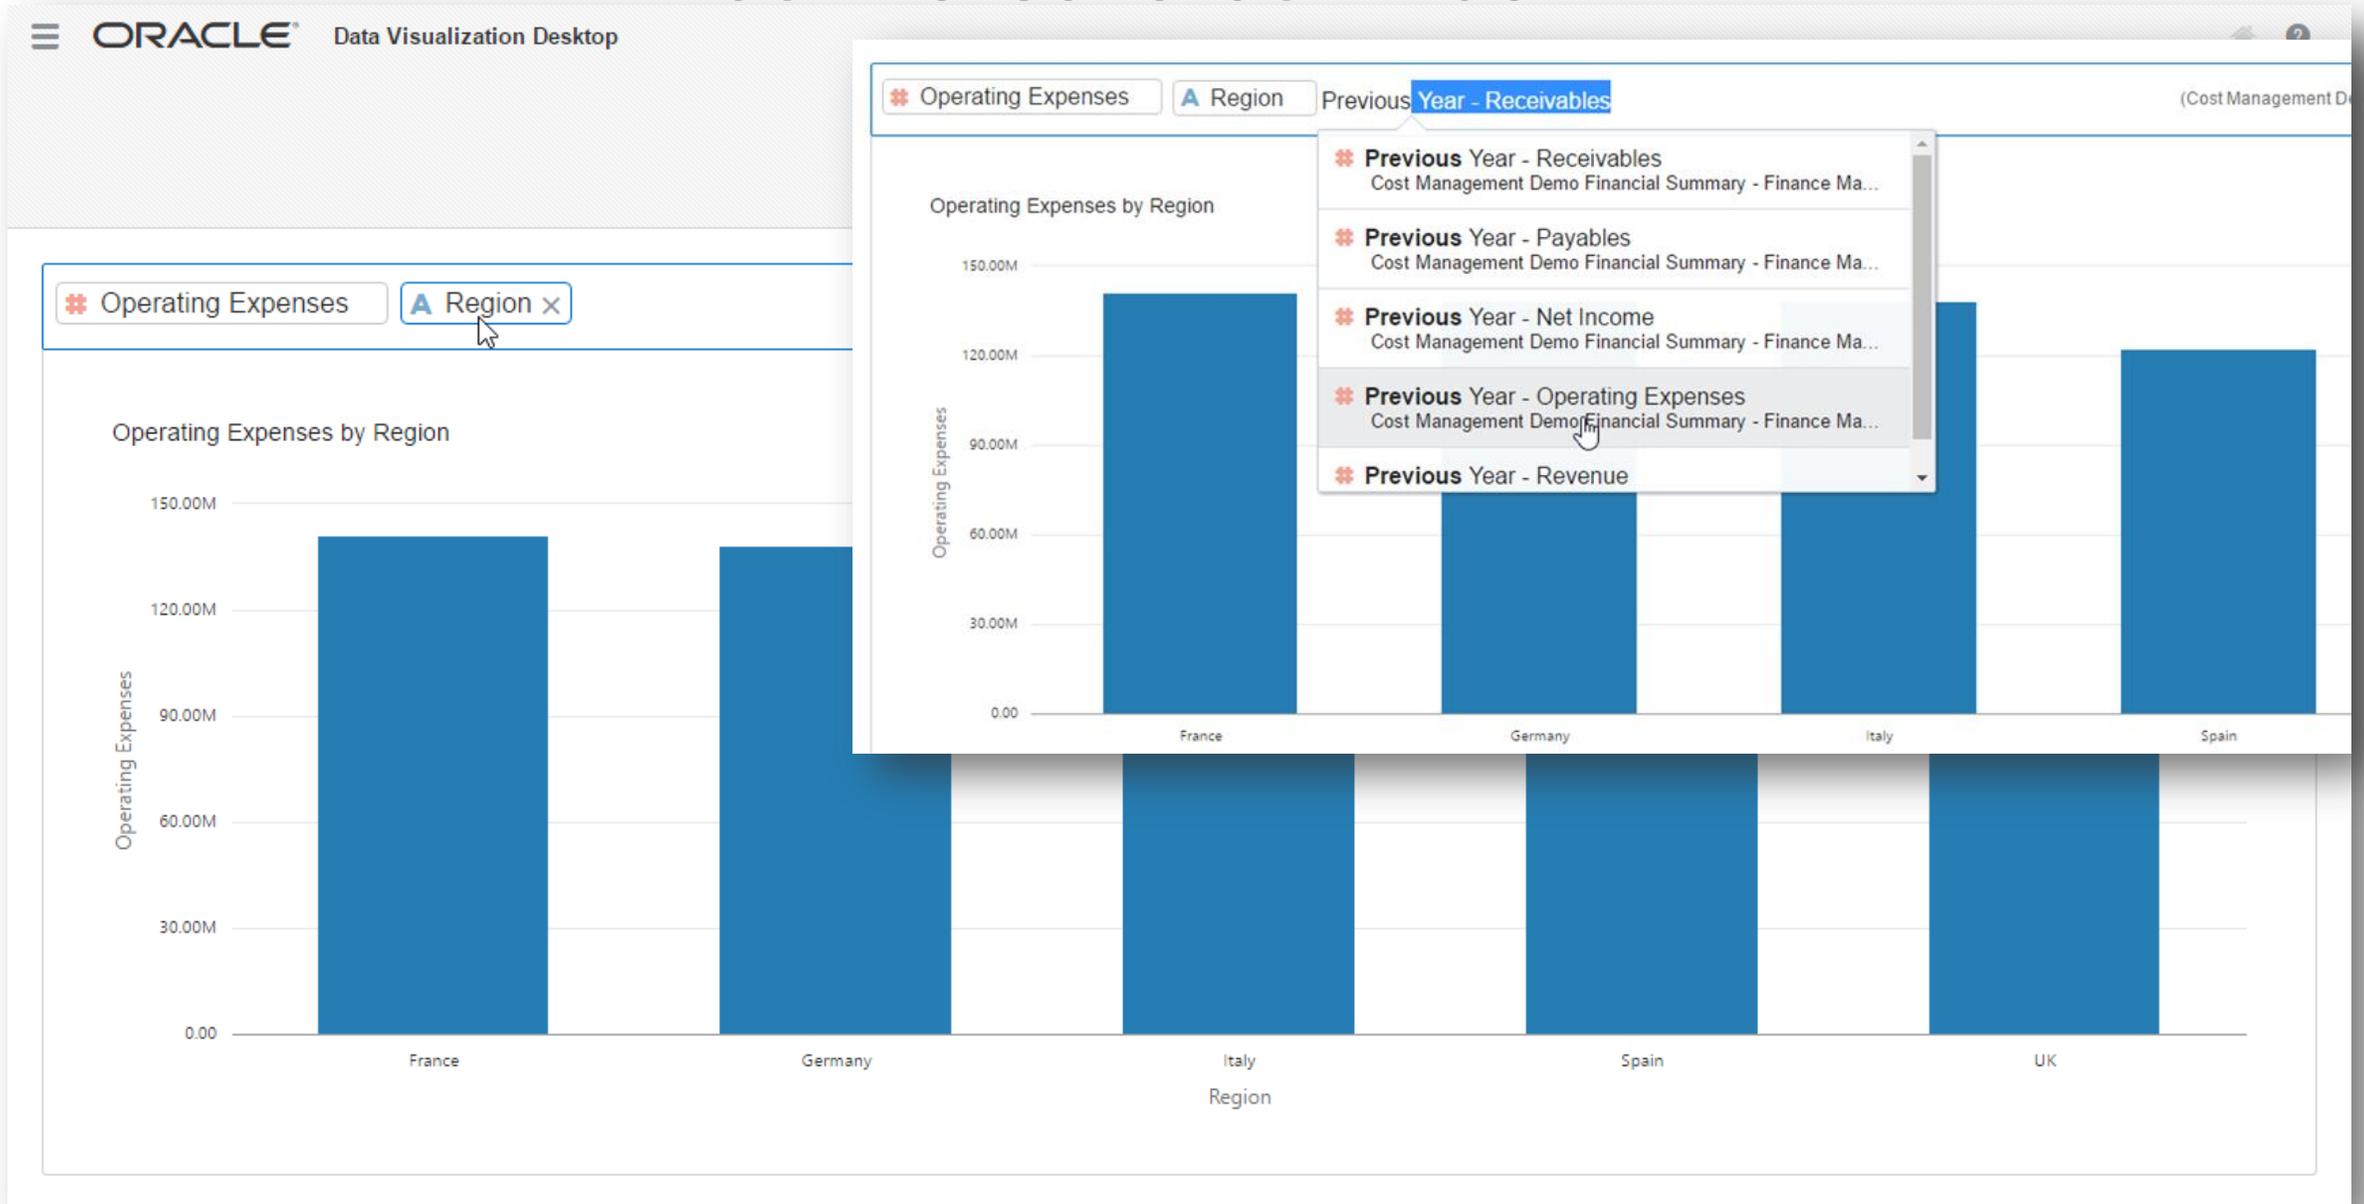

The main content area is divided into several sections:

- Search Bar:** A search bar with the placeholder text "Find content or visualize data".
- Display:** A section with a "My Folders" button.
- Create:** A section with a "Project" button.
- My Folders:** A section titled "My Folders" with a date filter "Mar 23, 2017". It contains a bar chart showing data for various categories.
- Search Results:** A search results panel for "Operating Expenses". It shows search results containing "Operating" and visualizations using "Minor operations Tyre Data", "Operating Expenses Cost Management Demo Financial Summary - Finance Ma...", and "Previous Year - Operating Expenses".
- Visualizations:** Three visualization cards are displayed: "Expenditure Variance Analysis" (Data Visualization, Just now), "Budget Aree per Prodotto" (Data Visualization, 10:31 AM), and another card (Data Visualization, 10:29 AM).
- Summary Cards:** A row of summary cards with values: "2B", "658M", "118M", "148M", "981M".
